Wilson's focus: issues of Utah

By CLARK H. CARAS
Senior Reporter

He is facing a first-term incumbent United States senator who, in 1981, was rated by the Almanac of American Politics as one of the eight senators who will have the greatest influence in the coming years.

But he, as the challenger, is the mayor of the largest city in the Intermountain West. Since his election in 1976 and re-election in 1980, Salt Lake City has upgraded its international airport, seen crime drop and had an increase of 47,944 new jobs in the private sector.

Ted Wilson will challenge Sen. Orrin Hatch, R-Utah, for his seat in the United States Senate on Nov. 2.

Wilson said, "I decided to run for the United States Senate because of my belief in, knowledge of and concern for the people of Utah."

"The issues of Utah are the essence of this campaign. There are clear differences and there is an opponent, and that is the best kind of campaign for the people."

The latest unemployment figures show 60,000 Utahns were out of work, Wilson said. This is a personal tragedy to him when, "we have the finest brainpower in the world and resources to match."

Wilson said there would really be 14 percent unemployment if the hours of lost work were added up.

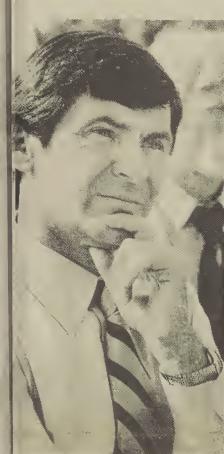

"I want the president's program to succeed. But it's not," he said. "It's going to have to be adjusted."

Differences between Hatch and Wilson are many, according to Wilson.

"I'm not for 'staying the course.' And I'm tired of the Pentagon generals getting blank checks. I also want to hold the line on social services."

On defense spending and American commitments abroad, Wilson said, "We can't cure the problem by continuing to pour men and weapons into western Europe."

Hatch tells Utah 'Stay the course'

By CLARK H. CARAS
Senior Reporter

In 1976, he ran for public office for the first time in his life. When the votes were counted, Orrin Hatch had received 54 percent of the vote and had defeated a three-term incumbent senator.

Now he, as the incumbent, is the chairman of the Senate Labor and Human Resources committee, and a member of the Senate Judiciary, Budget, Agriculture and Small Business committees.

Wednesday Hatch told an audience at the BYU law school that his positions on the various committees are no reason to vote for him. But he said they should consider the fact that if he loses, these positions will go to people who do not believe in "staying the course."

Hatch said he believes this election is not only important because he is up for re-election but also, "because in 1980 this country changed course."

"The voters of this country chose a new direction and they chose Ronald Reagan and the first Republican majority in a generation."

Hatch said he does not care who has been the president in the past, whether a Republican or a Democrat.

He said, "It has been the congress of the United States who has done what has been done to this country."

Reagan's policies have only been functioning for less than a year, Hatch said. "The Democrats in Congress weren't able to stop his policies, but they did delay them. Yet, even though they have only had a year to work there is already a monumental record to show for it," he said.

Umultuous Latin America may be approaching peace

By DAVID L. CHANDLER
A professor of history at the University of Hawaii, Dr. Chandler is an expert on Latin American relations, international relations and Latin American history. He has lived in Latin America for two years and traveled in Central America and South America. His research has focused on the causes of failure to meet basic human needs have created violent political and social conflicts in Central America. He recently returned from a trip to South America where national problems, already worsened from inefficiencies and years of civil strife, are devastated by the high cost of oil and the world recession which has restricted markets

and lowered prices for their agricultural exports.

Chronic underemployment and unemployment ranging between 30 percent and 70 percent exists in the nations of the region. Chronic inequities in land tenure and distribution of wealth exist, because in most countries a small percent of the population owns or controls most of the land.

About half of the people of the area make their living tilling the soil, yet they are among the poorest people, working long and hard for bare subsistence wages. Per capita income ranges from \$500 to \$900 per year. It is not unusual to find 80 percent or more of the population sharing only 20 percent or less of the national income.

The resulting poverty often results in inadequate health and living conditions, which cannot meet minimum standards. Malnutrition and rural areas and urban slums. Caloric intake in most countries is low, barely exceeding 2000 calories daily. Many Central Americans are hungry and many more are malnourished.

Adult literacy in the area as a whole is about 60 percent and access to primary education is available to only about 50 percent of school age children (World Bank World Development Report 1980).

Explosive population growth compounds all these problems and deep political divisions among nations, as well as within them, have prevented

any sustained attempt to deal effectively with these and other problems either on a regional or national level. In recent years, however, Central America's most troubled nation has been Nicaragua. In 1979 the FSLN (Sandinista National Liberation Front) overthrew the 40-year rule of the Somoza family.

Even though a tyranny, this dictatorial regime brought dramatic progress and modernization to Nicaragua. Farming and production were mechanized and production boomed. Dams and power lines were erected. Roads and highways were opened. Spurred education, public health and even some social welfare measures.

Effect of stress on unborn child topic of assembly

The impact of stress during pregnancy on the baby's brain and behavior will be discussed Tuesday at the Forum on Stress, by a nationally known physiologist.

Dr. Donovan E. Fleming, a BYU professor of psychology, will speak at 10 a.m. in the Marriott Center. His lecture will include a slide presentation.

Fleming said high levels of stress play a dramatic role in bodily functions. "As a matter of fact, it is quite apparent that stress is a major factor in a large proportion of physical and mental disorders."

"In pregnancy, a special relationship exists between the mother and the developing fetus," he said.

In the forum he will discuss whether this relationship protects the fetus from untoward effects associated with stressful situations experienced by the mother; whether maternal stress prejudices the normal physical and emotional development of the offspring; and whether mothers' individual differences in response to stress can be observed in offspring behavior.

Fleming holds a bachelor's and a master's degree in psychology from BYU and a doctorate degree in physiological psychology from Washington State University.

Win puts WAC crown within Cougars' grasp

By GARY HATCH
Assistant Sports Editor

It wasn't a rain cloud in sight Saturday, but a football team brought out Hawaii's 39-25 homecoming victory and a title during Western Athletic Conference season the Cougars can see beyond the catching a glimpse of the WAC crown in the distance.

"It's back where we can chart our own destiny, s'where we've wanted to be all along. Now in the whole thing outright, if we can win of our games," said Coach LaVell Edwards.

has been playing with its back against the wall this season, but we've lost to the Air Force Academy in the WAC opener, and Saturday was no exception for BYU.

Hawaii, which was in the conference lead going into the game with a 3-1 WAC record, was must-win situation, and Rainbows capitalized on mistakes and came up with big plays like the Cougars all they could handle.

Hawaii quarterback is such a good athlete. He came up with the big plays and kept them in the game.

Just as the defense was tested early and strengthened as the game wore on, the offense got better throughout the game.

For the second game in a row, the Cougar offense, guided by signal caller Steve Young, dominated a deceptive, quick and previously stingy defense.

"They had great defensive speed, and they were very deceptive," said Young, who was on target 22 of 32 passing attempts for 302 yards and two touchdowns.

"They tried to confuse us and fool us into doing something that really could have hurt us, but we were so well prepared for them that we knew what to do," Young added.

Preparation wasn't the only key for the Cougar offense. Young is getting better at making scrimage-line adjustments, and the line is giving him the protection he needs.

"Steve is learning and reading defenses and anticipating what the other team is going to do," said Neil Batholomew, who caught six of Young's passes for a total of 145 yards, including a 52-yard bomb for a TD. "He saw an opening in the defense and called an audible on that one," Batholomew said of the long scoring strike.

As has been the case all season, the offensive line again dominated its opponents.

"We're as settled as we know how our responsibilities and we know what each other's moves," said center Bart Oates. "And I don't think there is a stum or a blitz conceivable to man that we haven't seen. We just have to execute."

When asked about playing against Hawaii's junior noseguard Falaniko Noga, who was named All-WAC his freshman and sophomore years, Oates said, "He's probably outstanding for their team, but after playing against our team all spring

BYU quarterback Steve Young shakes off the Rainbow Warriors during Saturday's 39-25 Homecoming win over Hawaii. The Cougars put themselves in good position to

repeat as WAC champs as they defeat the Rainbows their second conference loss of the season. Young passed for 302 yards and two touchdowns in Saturday's triumph.

Lack of civil rights problem in Korea

By DENNY ROY

While the government of Korea has made significant progress toward the democratic ideals espoused by American advisors, the repression of civil rights remains a problem in this Far Eastern nation, speakers said during a recent BYU "Spotlight on Korea" conference.

"There is a significant civil rights problem in Korea today," said Seo Dae Seok, director of the Korean Studies Center at the University of Hawaii, who also said the relationship between Korea and the United States undervalues cultural exchange.

"Since 1945, the United States' relationship with Korea has been predominantly military," said Seo in an address titled, "The U.S. and a Divided Korea."

"I have lived in America long enough to know that we are closer to America than any other country. I think we need more Mormon missionaries in Korea, not just seagulls and corporals in overalls," he said.

Seo said the current government of

Jeon Du Hywan, a former army general educated in Korea, lacks the American idealism evident in the administration of his predecessor, Pak Cheong Hi, who studied at Princeton University.

Though Korean-American relations were marred by the pre-World War I Taft-Katsura Agreement, which acquired Korea's land from Japan, the Korean people responded with unusual enthusiasm to American economic aid, Seo said.

"One of the success stories of American aid to an underdeveloped people," said Seo.

"Korea has been a responsive and appreciative ally," Spencer Palmer, associate director of the BYU Center for International Studies, former director and a former president of the LDS mission, said during an address titled "The U.S. and Korea in the Historical Legacy."

Palmer quoted Korean scholar Kim Sae Jin, who wrote, "No other two countries have shared a closer bond and more common trials in the post-World War II era than Korea and America."

Homecoming Spectacular

Show brightens 'horizon'

By LONI MANNING and JOHANNA THOMPSON

Staff Writers

Watching the BYU 1982 Homecoming Spectacular made the "Horizons" seem a little more colorful, a little more cheerful and a whole lot brighter.

With more than 700 students singing, dancing and performing, one couldn't help but be drawn to a new horizon in entertainment.

Indians, cossacks and creatures from outer space lined this "Horizon" spectacular Friday and Saturday evenings in the Marriott Center as performers led the audience through changes in American entertainment from the simple folk music of wagon-bound pioneers to "Flying," from E.T.

Mary Jo Clegg, alias Gordon Harkness, former BYU music student and professional TV and performing artist, grabbed the audience with her opening medley from "Paint Your Wagon" and held them in the palm of her hand through the entire production.

Glen Miller

Harkness, who has performed with both the Ray Charles singers and the Glen Miller Band, sang a medley of Glen Miller favorites, including "Serenade in Blue" and Miller's first Gold Record hit, "Chattanooga Choo Choo."

Kids sing and dance

The audience eagerly applauded the efforts of the BYU Children's Dance

group in its selections from the Broadway musical "Annie." Choreographer for this production was Pat Dohenam, and Wendee Jensen Truman was vocal coach. The children sang and danced in the selection of "It's a Hard Knock Life," after which emcee Gordon Harkness and BYU student Linda Cameron sang the duet "Easy Street." Soloist Holly Morris sang the part of Anna in "In the Sun Will Come Out Tomorrow."

Watching Elliot and E.T. climb up into the heights of the Marriott Center rafters, Harkness continued his commentary on American music by saying that, "You have to be ever climbing, ever pushing to reach the impossible dream," after which he led the entire cast in "The Impossible Dream."

E.T. comes home

"Flying," from the movie "E.T.," performed by the Dancers' Company, was another highlight of the evening, the audience by surprise. The company, directed by Pat Dohenam, was able to catch the essence of the popular movie with lively choreography which included scurrying around the stage on bikes with "Elliot," carrying E.T. in his bike basket. Finishing the number with an unexpected treat, "Elliot," played by Dancers' Company member Jason Ayon, rode off into space with E.T.

In the "Pioneer Suite," 16 dancers rested from pioneer toils and broke into lively dances.

The audience eagerly applauded the efforts of the BYU Children's Dance

Sister Kimball hurt, misses honor brunch

Sister Camilla Kimball, wife of LDS Church president Spencer W. Kimball, was admitted to LDS Hospital Friday with a broken hip after falling in her Salt Lake City apartment. Sister Kimball was listed in satisfactory condition after surgery was performed Saturday to replace the hip.

During a Friday brunch at the home of the Camilla Eyring Kimball Chair of Home and Family Life at BYU, Sister Kimball was honored for her exemplary life and service. BYU President Jeffrey R. Holland conducted the meeting and announced that the funding provided by the chair will be put to use starting winter semester of 1983. The funds will be used to bring eminent family-life scholars and lecturers to campus.

Dr. Ruth E. Brasher, associate dean of the College of Family, Home

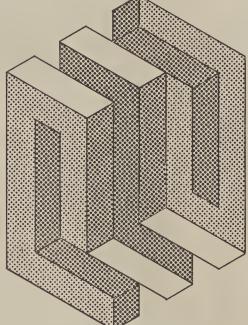

and Social Sciences, and Phyllis Marritt, a close friend of the Kimballs, are co-chairing the fund-raising effort for establishment of the chair. Marritt set the fund-raising goal as \$1 million and the campaign deadline was made by Dr. Virginia Cutler, a retired professor from the college.

Brasher said the chair "will provide the opportunity for BYU to become the primary university in the nation in the family, home and social sciences."

Dr. Martin Hickman, dean of the college, said the Kimball chair is a college to recognize efforts worthy of national growth that Sister Kimball has been associated with." Hickman said the bestowal of the chair will be one of the highest honors that can be given to a family scientist in the United States.

Sister Kimball was scheduled to attend the meeting, but was unable because of her injury.

News Spotlight

By THE ASSOCIATED PRESS

Plane crash kills 14

TAFT, Calif. — An airplane carrying skydivers crashed after takeoff and "burst into flames like a bomb" near this central California town Sunday, killing all 14 people aboard.

"It got 150 feet in the air and stalled out," said Adel Gholib, owner of the Taft School of Sport Parachuting from where the plane took off before crashing into a skydiver landing area. "It veered off, landed on its left wing tip, and burst into flames like a bomb."

Don Llorente, of the National Transportation Safety Board, said Sunday investigators will check the possibility that the privately owned, twin-engine Beechcraft was overloaded or imprecisely balanced.

Police patrol Poland

WARSAW, Poland — Riot police with automatic weapons patrolled the steel city of Nowa Huta on Sunday to prevent further street fighting.

Ricks increases tuition

REXBURG, Idaho (AP) — Ricks College will increase its tuition for the 1983-1984 school year. It will raise its fees \$55 a semester for LDS Church members and \$75 for non-members. The tuition fees will be boosted to \$625 for members and \$875 for others.

Underground leaders of the banned Solidarity union said workers in four cities will stay at home today in a new protest action.

Boris Wlosik, a Krakow suburb where street clashes erupted three nights running last week, stated Wednesday — one week after being shot by police during violent protests.

Official sources in Krakow said the funeral could raise new tensions, adding a firm date probably would not be set until Monday, despite the availability of the body. His death, officials said, remains under investigation.

Wlosik, who worked at the Lenin Steel Works in Nowa Huta, was the first person to die in street fighting since Parliament outlawed the Soviet bloc's only free labor union on Oct. 8. He was the 15th riot-related death since martial law was imposed Dec. 13.

Acid found in gargle

CLEARWATER, Fla. — Authorities pulled Lazarus mouthwash from the shelves of a store after four bottles were found laced with acid, the latest contamination of a consumer product since seven people died from Tylenol capsules containing cyanide.

Cougars 'parade' their spirit

By COLLEEN FOSTER
Staff Writer

Crowds lined both sides of Center Street and University Avenue in Provo on Saturday to watch about 100 floats, dignitaries, bands and drill teams pass during the BYU 1982 Homecoming Parade.

The BYU International Folk Dancers, the largest entry in the event, won two of the most coveted prizes of the parade. With more than 250 participants stretching the length of a block, the group received both the Grand Marshal and Spirit Awards.

The folk dancers danced in costumes representing countries all over the world, as they followed their float. Spirit Award was a new idea this year, according to Greg Fullmer, parade chairman. Each entry was judged according to how well it sparked the audience's spirit, he said.

"They were looking for something colorful, something that made them smile, related to the theme, and on overall enthusiasm," said Dawn Nichols, parade committee member.

The parade was led by Grand Marshals Kieth and Dagmar Merritt followed by President Jeffrey Holland and his wife, Pat, and Cosmo riding in a Rolls Royce. Miss BYU 1982, Teresa Chingas, and her attendants followed the Cougar Band and the Cougarettes.

A float by the BYU Social Dance Club received the President's Award, and the Cosmo Award went to a float

featuring Miss Utah Michelle Smoot. In the social club division, Samuel Hall was presented the Cougar Award for its entry.

A "Briefcase Brigade" of about 40 BYU law students received the Special Events Award. They amazed Fulmer by passing out suitcoats with shorts and carrying the lawyers' constant companion — briefcases.

"We're sick of tired of boring parades," said Fulmer, who called this

year's parade "classy." He said he wanted more crowd interaction.

Clowns, Star Wars characters and the ASBYU "Social Doctors" mingled with the crowds all along the parade route, handing out candy, movie tickets and 300 free Bands.

Invitations were sent out to high school bands and drill teams all over Utah and Idaho, and a total of 30 were entered

in the parade. Top awards were presented to the Layton High School band and the Bear River drill team.

A disc jockey from a Provo radio station was at the parade site, announcing the entrants as they passed through the crowds. Other features were the Willlettes from Ricks College, the "Stars" and "All That Jazz," two mini-dancing groups of girls under age 15.

Although in track he usually runs the "middle distances" — about half a mile or a mile — Edwards said the race course was a fun one.

He said, "It was a great race," he's fantastic," Edwards said. During their college track trips, Padilla and Edwards had sometimes roomed together. "He's a world-class runner."

Top finishers in the 17 race divisions were awarded prizes like running watches, running shoes, sweat shirts, windbreakers and BYU hats.

Patrick Shane, who started the annual road race and organized this year's race, said "The race was a success. It was a beautiful morning perfect for a race."

Most of the entrants were non-competitive runners participating just for pleasure. A huge majority of the entrants are BYU students, he said, though people as young as 7 and as old as 50 entered.

Hatch . . .

Continued from page one
in this election is whether Americans will continue in this new direction they have chosen, Hatch said.

As unemployment figures continue to rise, the need for creating new jobs has become a major campaign issue. Hatch said he believes the best way to stimulate jobs is "to stay the course."

Another issue raised in the Hatch-Wilson race is that of defense spending. Hatch said he believes that the United States is a "second place to the Russians." Therefore, this country needs to have the massive amount of defense spending that has been allocated in order to bring it on a level to match the Russians, he said.

Despite Democratic complaints that the Republicans are using too much of the national budget for defense spending, Hatch said, "We have made cuts in the defense budget. We cut \$8 billion this year alone."

During the campaign, Hatch has been accused by his opponent of spending too much time away from Utah and Washington, D.C. Hatch said, "During my term as senator, I have spent one out of every five days in Utah. Any senator who thinks he is only good for representing Utah and that his influence ends at the state's borders is not going to be a very good senator at all."

The Spirit Award was a new idea this year, according to Greg Fullmer, parade chairman. Each entry was judged according to how well it sparked the audience's spirit, he said.

"They were looking for something colorful, something that made them smile, related to the theme, and on overall enthusiasm," said Dawn Nichols, parade committee member.

The parade was led by Grand Marshals Kieth and Dagmar Merritt followed by President Jeffrey Holland and his wife, Pat, and Cosmo riding in a Rolls Royce. Miss BYU 1982, Teresa Chingas, and her attendants followed the Cougar Band and the Cougarettes.

Bount paces Brews 3-2 Series lead

YOUNG (AP) — Robin Yount capped a four-game series with a home run, leading the Brewers to a 6-4 triumph over the Cardinals Sunday and a one-game 3-2 World Series lead.

According to the cheers of "MVP, MVP" from 56,562, Yount had a double and two with his solo homer in the seventh scored twice and figured in two of Milwaukee's runs.

With four hits in Game 1, it is the first time in Series history to have two four-hit games with 11 hits and six RBI in 21 at-bats. The Brewers lead the best-of-seven game three games to two.

Young pitched Mike Caldwell, the game's top pitcher, to his third, 10-0 masterpiece. This time, the Cardinals battled each inning, banging out 14 hits and giving him one to win in the top of the ninth.

Young, who saved Game 4, came in after Sanchez doubled in one run and scored on George Hendrick. McCullum gave up a Darrell Porter, but struck out Willie McCovey of Game 3, and got pinch-hitter Eddie to fly out left to preserve the victory, which returns to Busch Stadium in St. Louis.

With 30 times the Series has been tied at two games, the winner of Game 5 went on to win 23 times. The Cardinals will try to end Game 6 with rookie right-hander, while Milwaukee will go with veteran

Edgar, who opposed Caldwell in Game 1, and St. Louis Sunday. Although less effective, he was better than his first time out and yielded 10 hits and four earned runs.

The Brewers scratched for their runs, each in the first, third, fifth and seventh. Forsch scattered eight hits in seven innings, ending with a leaping ninth-inning catch as the St. Louis Cardinals beat the Milwaukee Brewers 6-2 Friday.

Cardinal starter Joaquin Andujar was the winner, pitching a two-hitter until he was struck by a sharp, one-hop single by Ted Simmons in the bottom of the seventh inning. Andujar left the game in extreme pain, carried off the field by his teammates.

After Jim Kaat and Doug Bair loaded the bases in relief of Andujar, Bruce Sutter gave up a two-out home run to Simeon Thomas, and then homered to Cecil Cooper in the eighth but retired the Brewers in the ninth to record his first save in the Series to go along with a victory in Game Two.

And, in the ninth, Sutter heaved a sigh of relief when McGee raced to the left-field center wall and leaped above the rail to snare a drive by Thomas that could have cut the St. Louis lead to two runs.

Ben Oglivie had reached on a fielding error by first baseman Ken Keltner, and Thomas then hit a long drive that looked every bit a homer.

Instead there was a long out.

McGee's three-run homer in the fifth inning ended a scoreless pitching duel between Andujar and Milwaukee's Pete Vuckovich. McGee added a solo home run in the Cardinals' two-run seventh, also off Vuckovich.

Young followed with a double into the

left-field corner, sending Molitor to third and bringing Cooper to bat.

Cooper hit a high bouncer to Hernandez at first base. The ball took a monster hop to Hernandez's right, and the Gold Glove first baseman deflected it as it skipped past his head. Molitor scored, but the play saved one run as Young was stranded on third.

Brews romp, 7-5

Gorman Thomas and Robin Yount drove in two runs each in Milwaukee's six-run seventh inning as the Brewers roared back to beat the St. Louis Cardinals 7-5 Saturday and tie the Series at two games apiece.

The Brewers were the most in one inning since Baltimore scored six in the eighth inning of Game Four of the 1979 World Series against Pittsburgh, and they helped the Brewers avert another last-chance predicament.

Left-handed reliever Bob McClure kept Milwaukee fans from discovering whether one of their favorite sons, injured reliever Roger Fingers, was indeed able to pitch. He did not allow a run out of the bullpen and killed a potential St. Louis rally as Fingers, who has not pitched since Sept. 2 because of a torn muscle in his right arm, warmed up in the bullpen for the first time in the Series.

Trailing 5-1, the Brewers rocked four St. Louis pitchers in the seventh, two of whom were unable to retire a batter.

Facing the possibility of a 1-3 deficit in the Series, a corner out of which only four teams have emerged champions, the Brewers struck with a vengeance and finally chased Cardinal starter Dave LaPoint.

McGee hits 2 HRs

Rookie Willie McGee drove in four runs in a record-setting two-home run and robbed Gorman Thomas of a home run with a leaping ninth-inning catch as the St. Louis Cardinals beat the Milwaukee Brewers 6-2 Friday.

Cardinal starter Joaquin Andujar was the winner, pitching a two-hitter until he was struck by a sharp, one-hop single by Ted Simmons in the bottom of the seventh inning. Andujar left the game in extreme pain, carried off the field by his teammates.

After Jim Kaat and Doug Bair loaded the bases in relief of Andujar, Bruce Sutter gave up a two-out home run to Simeon Thomas, and then homered to Cecil Cooper in the eighth but retired the Brewers in the ninth to record his first save in the Series to go along with a victory in Game Two.

And, in the ninth, Sutter heaved a sigh of relief when McGee raced to the left-center field wall and leaped above the rail to snare a drive by Thomas that could have cut the St. Louis lead to two runs.

Ben Oglivie had reached on a fielding error by first baseman Ken Keltner, and Thomas then hit a long drive that looked every bit a homer.

Instead there was a long out.

McGee's three-run homer in the fifth inning ended a scoreless pitching duel between Andujar and Milwaukee's Pete Vuckovich. McGee added a solo home run in the Cardinals' two-run seventh, also off Vuckovich.

Young followed with a double into the

BYU vs. Colorado State STUDENT FOOTBALL TICKET DRAWING

N-UP

Date: Monday, Oct. 18 & Tuesday, Oct. 19

Place: 4th floor ELWC (ASBYU)

Times: 8:00 a.m. till 5:00 p.m.

REQUIREMENTS

Each student must be present with his or her own Full Time activity card to sign-up. Part-time students and spouses are not eligible for ticket sign-up. Spouses with spouse cards can sign in place of their student spouse provided; they have a valid spouse card and their spouse's Full time activity card.

DRAWING RESULTS:

The drawing will be done Wed., Oct. 20 in the Memorial Lounge, Drawing results will be posted on:

Date: Thursday, Oct. 21

Time: 8:00 a.m.

Place: ELWC Stepdown Lounge and ASBYU Athletics office, 445 ELWC

KET PURCHASES

Those whose names have been selected may purchase their tickets:

Place: Marriott Center Ticket Office

Date: Thursday, Oct. 21

Time: 10:00 a.m. till 5:00 p.m.

Cost: \$1.00 per ticket. (2 tickets per student)

Note: ANY TICKETS NOT SOLD ON OCT. 21 WILL BE PLACED ON SALE TO ANYONE.

SE STUDENTS WHO HAVE SEASON TICKETS ARE ELIGIBLE FOR ANY TICKET DRAWINGS.

Students who may have extra tickets may resell them to the Marriott Center Ticket Office. This would be greatly appreciated!

Cougars' Homecoming win

Continued from page one
and this fall, it's easy playing against anyone else."

Despite the potency of the Cougar passing attack, Hawaii coach Dick Tomey said that wasn't what won the game for BYU.

"I think the key to their win was their running attack," Tomey said. "The thing that hurt us most was the draw. That's a credit to their linemen. They're just a tag physical team."

For the opening touchdowns it was obvious the game was going to be in my way a repeat of last year's defensive struggle when the two teams met in Aloha Stadium.

The 'Bows, normally a run-oriented team, opened the scoring on their first possession when Quarles came out throwing four times, completing three for 63 yards, including a 32-yard strike to Walker to make the score. The PAT failed on the second of a bad snap.

The Cougars came out the second half smoking. They won 80 yards in two plays on a Young-to-Balholm strike for 28 yards, and topped that with another Young-to-Balholm connection for the score. Gunther missed the PAT.

Hawaii tied the ball game up on their last score of the afternoon that was set up when a Young pass was picked off by Rich Miano in the flat and returned 50 yards to the BYU 10. Anthony Edgar dove over from the one and the PAT was good, tying the score at 25.

The Cougars scored once more in the third quarter, driving 80 yards in seven plays, including a 32-yard bomb to Kirk Pendleton and a 26-yard scamper by Hamilton up the middle. The PAT by Gunther was good and the Cougars led 32-25.

The final score of the game came with just more than half of the fourth quarter left to play. Starting from their own 2-line following a perfectly placed Natividad punt, the Cougars marched 98 yards in six plays that began and ended with superb Tamali runs. Tamali scored on a 21-yard draw play, ending what Edwards called one of the great drives in BYU history.

tight and Steve Harper, who was in the game with a double tight-end formation. Young was stopped short of the end zone on two-point conversion attempt.

The final score of the half was set up when BYU's Shell blocked a Hawaii field-goal attempt. The Cougars then drove from their own 47 to the Hawaii 26 before being stopped when Young failed to connect with Gunther on a third-and-one. Gunther then hit a 43-yard field goal with 1:45 to go in the half to give BYU the 19-18 lead it carried into the locker room.

All-Stars

paced by Moseley

WASHINGTON (AP) — Mark Moseley of the Washington Redskins kicked a 45-yard field goal with 1:01 remaining Sunday to lift the National Conference team to a 23-22 victory over an American Conference team in a unionized football game before a sparse crowd at RFK Stadium.

Moseley's third field goal of the day also connected from 43 and 39 yards.

Nicks cut by Jazz

SALT LAKE CITY (AP) — The Utah Jazz have waived veteran guard Carl Nicks, one of the team's most popular players last season, and Coach Frank Layden says he may make more cuts.

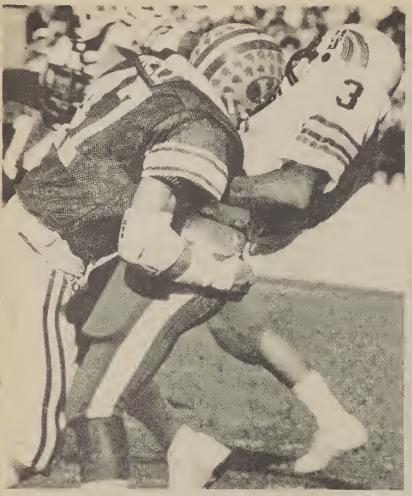

The departure of Nicks leaves the Jazz with 12 players on their pre-season roster.

BYU's Todd Shell sticks it to Hawaii tailback Anthony Edgar during Saturday's 39-25 victory over the Rainbow Warriors. Shell, last week's WAC defensive player-of-the-week, enjoyed another stellar performance against the 'Bows Saturday.

Universe photo by Steve Pipe

Shell Y's answer to foes' offense

By SCOTT TAYLOR
Staff Writer

Amidst the discarded towels and athletic tape strewn about the Cougar locker room after the BYU-Hawaii football game Saturday, the presence of one person demanded attention: Shell, the player just with "47" and "Shell" spelled out in bold white letters and numbers, this individual was chewing on a football.

It sounds like Todd Shell, the Cougar outside linebacker, who had just spent his afternoon chewing on the Hawaii offense.

But another jersey appears — the name and numbers identical — over the first.

If recent opponents haven't seen enough of number 47 and the name Shell, it seemed as if there are two to contend with.

Yes, there were two Jersey-clad Shells in the locker room — the stand-out defensive gridiron Todd Shell and his son Tanner, who will be 2 years old next week.

Tanner, nibbling on a miniature white-and-blue football, seemed timid but at ease waiting for his father, who went about the locker room congratulating teammates.

Shell, named WAC defensive player of the week for his performance last week against the Cougars, led the Cougar defense in thwarting the opposing offensive attack.

"It was a team effort, just like against New Mexico," Shell said following the game, adding that the 'Bows execution was better in the game than what the Cougars had seen previously on film.

Shell's play once again demanded attention from the media because he made four unassisted tackles and lent a hand on eight other defensive stops.

He registered two quarterback sacks and late in the second quarter blocked a 47-yard Hawaii field goal attempt to set up a BYU field goal, sending the Cougars into the locker

room with a 19-18 lead.

Shell likes a quarterback sack by the defense to an aggressive slam dunk by a basketball player. "It gets the defense fired up," he said.

Shell seems to have a nose for the ball, frequently causing turnovers and coming up with the football in key situations.

This is the same Todd Shell that recovered an important kick against SMU in the fourth quarter of the Holiday Bowl. This is the same linebacker who scored the winning touchdown against Utah State last year with a 12-yard interception, and who earlier in the year returned another 12-yarder six points against Long Beach State.

Shell says it's usually just a matter of being in the right place at the right time, but added, "It's the linebacker's job to get to the football, especially in the 3-4 defense."

One way of getting to the ball unexpectedly is blitzing. "I'm probably blitzing more than 50 percent of the time," Shell said. "It makes it more fun."

Shell, who is quick to point out the achievement of teammates, complimented the performance of others when congratulated on his play. "The defensive line was just all over the field today," he said, singling out the play of defensive end Mike Morgan, Brandon Flint and Chuck Elkins.

Shell virtually ignores his recent WAC recognition with linebacker Brian Hansen, saying Hansen, "had his best game of the year by far."

The 6-foot-5, 203-pound Shell is called "Jack Lambert" by linebacker cohort David Aupiu, who compares the Cougar linebacker to the Pittsburgh steelworker star.

"Some build and everything," says Aupiu. "Some guys call (Shell) skinny, but with those legs, he's just quick."

Anywhere on the field, Shell has posed problems for the opposition.

Short spiker a giant on court

By GRANT SKABELUND
Staff Writer

Years of practice and hard work are evident as the athlete moves seemingly by instinct to the ball. The player dives, spears the ball and makes a perfectly placed pass.

The crowd screams in delight, but winces in pain as the athlete hits the ground. The team responds and executes its finely tuned offense in perfect form. In the end, the player is presented for the next play — and the next defensive maneuver.

Who is this athlete? Is it Tom Holmoe diving for the defensive save? No, the player passed the ball. Then is it Steve Young directing the potent Cougar offense? No again.

Unlike 6-foot-3-inch Holmoe, who is a member of BYU's offensive squad, and unlike the 6-foot-1-inch Young, who guides the potent Cougar offense, this 5-foot-1-inch athlete is probably the shortest competitor in NCAA Division I action. And the sport is not football.

This athlete is Michele Nekota. Nekota will not spend tomorrow diving onto the grassy floor in Cougar stadium, but she will be diving onto the hard wood of the University of Wyoming's volleyball floor.

Giant on team

Nekota, though short, is not small. She is a giant on a team that has reeled off 18 consecutive wins and posted a 21-3 mark thus far this season.

"I think that Michele is the best defensive player in the country," says Cougar volleyball coach Elaine Michaelis.

A senior from Honolulu, Hawaii, majoring in physical education with a coaching emphasis, Nekota started competing volleyball as a 12-year-old. Nekota said that she learned early that the way to make up for lack of height is found in one word: "perfection."

"She says that she feels more pressure to play mistake-free volleyball than her fellow teammates. They the coaches — expect consistency and perfection out of me."

"I feel my size is an advantage," Nekota said. "I am closer to the floor and I get to the ball faster," Michaelis said, "On defense she saves so many balls that we go down."

Nekota's statistics prove Michaelis' point. Before BYU's first conference clash with Utah on Oct. 8, Nekota had tallied 53 defensive saves, second behind Madge Ferreira's 73. But Nekota's accomplishment came in about half the playing time of Ferreira.

Defensive specialist

As a defensive specialist, Nekota

plays only on the back line — rotating in and out of the game with a front-line player. Volleyball rules permit a player to be substituted only three times in a game, and for this reason Nekota senses the importance of playing error-free ball. This is because the more time the Cougars turn the ball over, the more times BYU will have to mutate, thus lessening Nekota's chance to play.

Although Nekota played volleyball for the University of Wyoming, she said that she always wanted to play for BYU. When she got the opportunity, she jumped at the chance.

Although the taller spikers and blockers draw most of the attention in volleyball, Nekota says people have recently started noticing her. She said, "Since I've been here most of the time her coaches and teammates notice and give her credit, and this has helped to give her the reassurance and confidence she needs."

Confidence evident

That confidence was evident when Nekota and her teammates battled to win the championship of the BYU Preview invitational tournament. The Cougars won eight matches in three days to garner the title, and Nekota had to psych herself up for each match.

The two wins pushed the 14th-ranked Cougars' record to 23-3 overall and 3-0 in HCAC play.

Commenting on the road trip, Cougar coach Elaine Michaelis said, "We were concerned about it; to come away with two, three-game victories is really nice."

She said she expects Utah State tomorrow at 7:30 p.m. in Logan. The Cougars beat the Aggies in four games Oct. 12 in Provo.

"We would like to serve and pass well against USU," Michaelis said.

"If we play the way we did this weekend we would be playing good volleyball, which should make us the favorites in the match."

In a match that lasted only 40 minutes, Madge Ferreira, Kim Harring-

ton and Lisa Grandmaison led

BYU offense against the Ram High Country Athletic Conference.

The conference champion receives a berth in the NCAAC tournament, and Nekota said the Cougars have the potential to win. "It's not that far out of our reach," she said. "Anyone in

the top 12 in the nation could w-

The Cougars are currently ranked 11th in the NCAAC volleyball poll, their only losses having been to teams ranked in the top ten.

Y's women spikers reach 3-0 in HCAC

By GRANT SKABELUND

Staff Writer

Posting their eighth and 20th consecutive topless BYU's women spikers ripped Colorado State on Friday, before moving on to whip the Wyoming Cowgirls on Saturday in High Country Athletic Conference action.

The Cougars were shutout winners in both matches, sweeping past the CSU Rams 15-1, 15-6, 15-9 and then stopping the Cowgirls 16-14, 15-8, 15-7.

The two wins pushed the 14th-ranked Cougars' record to 23-3 overall and 3-0 in HCAC play.

Commenting on the road trip, Cougar coach Elaine Michaelis said, "We were concerned about it; to come away with two, three-game victories is really nice."

Stress launches heart attacks

By HOLLY ARMSTRONG
Staff Writer

Stress is a major factor contributing to sudden cardiac death, said Dr. Heng P. Ruddel from the University of Nebraska Medical Center.

Ruddel is on leave from the University of Bonn in West Germany to do research in the department of preventive and stress medicine at the cardiovascular center of the University of Nebraska.

He discussed the relationship between behavior and physiology in a lecture titled "Is It Worth Dying For?"

"I do not want to scare you," Ruddel said. "but 1.2 million Americans suffer acute myocardial infarctions, or heart attacks, every year. More than half of those die before they reach a hospital."

Ruddel said 500,000 Americans die from sudden cardiac death annually. This is approximately one per minute.

High blood pressure, cigarette smoking, high cholesterol level and obesity are all accepted risk factors in heart disease, he said. However, only half of the people who die of cardiovascular diseases have some of these risk factors.

The pattern for sudden cardiac death involves

problems with the endocrine system, existing heart conditions and electrical instability of the heart, Ruddel said. These three factors are inseparable.

It is difficult with current techniques to analyze these different mechanisms and determine who will die of sudden cardiac death, he said.

"It is definitely not enough to measure high blood pressure, overweight or cholesterol," Ruddel said.

These risk factors have strong behavioral components. For example, he said, cholesterol level rises with stress.

Ruddel said risk factors and human behavior have changed with time, but we have not changed enough physiologically to cope with these things.

Ruddel said there are two types of people with relation to how they handle stress physiologically. He termed the two types "hot reactors" and "cool reactors."

A hot reactor, he said, reacts more strongly with his physiology than a cool reactor.

Some people are cool on the outside, Ruddel said, but physiologically hot inside. "What you are acting is one problem," he said. "What your physiology is doing is another problem."

The best way to test whether a person is a hot or

cool reactor is through a laboratory test called a life-stress simulation, Ruddel said. Cardiac output, muscle tension, blood pressure and heart rate are measured in this test.

It is possible for a person to test himself to see if he is a hot reactor, he said.

A person can measure his resting blood pressure, and then subject himself to a stressful situation to determine his dynamic blood pressure, Ruddel said.

He said playing an Atari video game for at least two minutes is an example of a way to induce stress.

If systolic pressure rises significantly after stress, the individual is a hot reactor, he said.

This method is primitive and not very accurate, but can be used to get a general idea of one's reaction type.

How a person reacts physiologically can be effectively modified by eating moderately, exercising moderately and relaxing, Ruddel said.

"Remember the five T's," he said.

The five T's are trust, time, talk, touch and tease.

Taking time to do these things can reduce stress and modify physiological reactions, Ruddel said.

Forest scarred by acid rain

NEW YORK (AP) — A mountain-top Vermont forest once "deep green and dense" is now scarred by "gray skeletons of trees" that look as if a hurricane has ripped through them — and the most likely cause is acid rain, a botanist says.

"Fifty percent of all the trees that were alive on this mountain have died since 1960," said Jim's a Verner, chairman of the botany department at the University of Vermont, said Wednesday.

"I hesitate to say acid rain is unequivocally the cause, but we've been trying to eliminate other things. We can't find a disease. We can't find an insect pest. There are no climatic changes."

The problem is not limited to the United States.

All rain is slightly acidic. Carbon dioxide in the atmosphere dissolves in raindrops to form carbonic acid.

But acid rain is composed of droplets that have fallen through polluted air. The pollutants dissolve in the raindrops, increasing the acidity to levels that are toxic to trees and plants.

The problem is not limited to the United States.

Best to eat in moderation

A wide variety in the selection of foods and "moderation in all things" is the best way to prevent heart disease, according to Dr. Kay Franz, an assistant professor of food science and nutrition at BYU.

Franz lectured Thursday on the topic of diet's effects on heart disease as part of the Flea Market of Health lecture series.

"This topic is extremely controversial among scientific authorities," Franz said to an audience of about 70 people.

Although no rules can be made when speaking of preventive cardiovascular care — it is dependent upon each individual's makeup — some generalizations have been reached, Franz said. To decrease cardiovascular events, Franz suggested that one maintain normal weight and restrict dietary fats and cholesterol.

"There has been a big emphasis placed on the intake of salt," Franz said. "The main reason for this is that there is a new head of the Food and Drug Administration and salt is his thing."

"Salt is not a simple problem. For instance, athletes who sweat a lot perhaps shouldn't restrict salt intake," she said.

A decrease in intake of saturated fats and substituting polyunsaturates has been emphasized by some scientists in preventive cardiovascular care. However, about three years ago, the American Heart Association decreased emphasis on the use of polyunsaturates. This is because polyunsaturates have been found to increase noncardiovascular deaths, such as cancer, Franz said.

The average man in Utah county consumes 43 percent of his daily calories in fats, Franz said. She suggests reducing this intake to 35 percent.

Senate candidate Ted Wilson, Redford, in addition to being active in the Utah Senate working with cartoonist Garry Trudeau on a political comedy movie.

Actor 'not satisfied' with today's movies

By CLARK H. CARAS
Senior Reporter

Award-winning actor Robert Redford "Not satisfied with the quality of mate-
ing presented on the screen." was in Provo on Wednesday campaign-
ing corners for Senate candidate Ted

that because of what he is seeing on
the screen, "I've been developing my
and stories."

Redford said that he is still interested in it if it is for
admitted that he has been looking into
the possibility of buying Osmond Studios.

has not been anything extensive done
in studios. I was just aware that it
party." Redford said.

he finds the negative campaigning of
NIT-PAC, "Unfortunate, very unheal-
tive to have people coming in and hit-
people's personalities."

said if you stand back and look at the

overall political process of the new right, it "is
pretty bizarre."

Redford's story is about two completely different
people, he said.

"One's a liberal who represents the liberal
grasswoman, very popular and well established in a
liberal district in Maryland. And the other person is
one who designs the very negative campaigns for
the right. That's the part I would play," he said.

The two then fall in love and the story is what
you are going to do with that situation," Redford
said.

The actor said he has no intention of ever enter-
ing active political life. "I have an acute interest in
politics because it's an interesting process in which
decisions are made which govern my life. But I
have no desire in being a politician at all."

Redford said that by campaigning for Wilson he
has been able to enjoy another part of his life. He
said he had been working pretty hard so he "took a
year or two off."

In his campaigning, Redford said, he tries to
stick to areas where he lives and votes. During this
political year he has been involved in campaigns in
Vermont, Utah, Oregon and New Mexico.

"I am not a strict party-line person. I register
Democrat but I vote for the person rather than a party," Redford said.

He is still interested in it if it is for
looking at it, but there's been nothing
it's being looked at."

LONDON (AP) — Prince Andrew behaved "like
a prince in every sense of the word" during a much-
publicized, eight-day Caribbean vacation with ero-
tic actress Zoo Stark, Stark's mother says.

The couple shared nothing but "innocent fun," Kathi Caruso said.

"I ought to know what went on. I was there the
entire time," said the 62-year-old Caruso, who
chaperoned the trip.

She told the London Daily Express she was sorry
for the trouble the vacation has caused Andrew.

every cause of violence, revolt

University photo by Brandon Ford

Dr. Chandler in his office at BYU. Chandler, who teaches classes in Latin American studies and history, has lived in Colombia and has traveled throughout Latin America.

Continued from page one

which took over Nicaragua but left him and his family, who came to own one-third to one-half of the agricultural enterprises of the nation. Gradually, one by one the regime lost support of the less, businessmen, professionals and various sectors in society except the national

neats took to the streets or hills, the revolution began. In 1979, massive forces became an insurrection and insure civil war. In the end the national making war on its own people.

supported Samoza initially because of

caused severe economic dislocation and hardships, and many people were persecuted.

Another focus of turbulence and the need for reform in Central America is El Salvador.

In El Salvador, as coffee production began to boom after 1875, the land-owning oligarchy, to plant coffee, took over peasant and Indian plots and farms and even entire villages. By 1900 a few hundred people owned half the land.

Economic conditions for the peasant steadily worsened and aggravated further by the Great Depression of 1930, culminating in a massive peasant uprising in 1932, in which the peasants demanded reforms, especially land on which to grow food.

The government crushed the uprising mercilessly, killing thousands. Such was the old order's reaction to the need for reforms.

The old order, though, began to crumble in 1944 when the Sandinistas overthrew the regime of Samoza in May 1979. Two months later the repressive government of General Carlos Humberto Romero in El Salvador, which had run the country since the peasant massacre in 1932, was toppled by Jose Duarte and a group of young officers pledged to create democratic institutions and undertake socioeconomic reforms.

They promoted education and nationalized the banking system and coffee, cotton and sugar exports. They expropriated 600,000 acres owned by 376 families and turned it over to 60,000 families who had worked it for landlord families.

A second phase of the land reform would later also share give back the land they cultivated.

These reforms were violently opposed by both the left and the right.

The right, composed of the wealthy families of the old elite, opposed the reforms because they would take their land—the basis of wealth, power and social status. The left opposed them because reforms would take the edge off discontent that they might exploit to gain power. The left launched guerrilla attacks to disrupt the reform process and discredit the government determined to show that peaceful

and modernization he imposed on Nicaragua and after World War II the U.S. thing because he could be counted on to peaceful, orderly government and to command of radicalism or communism.

He began to look around the U.S. for assistance and military aid to Samoza the very end hoping that he could finish his repudiation constitutionally.

seeing the widespread support for the blant and excessive human rights the national guard committed to crush it, finally cut off military aid, increased Samoza to resign, and began to meet SLN, hoping to be able to moderate its influence in the government that would now.

approach had only limited success. The Sandinista-dominated government d the properties of Samoza, converting fields into schools and hospitals.

aid of doctors and teachers trained by unched a national health improvement and a massive literacy campaign that reduced illiteracy from 50 percent to 12 percent.

revolutionary government distributed assets and organized peasant cooperatives, nationalized the banking system and the industry.

diplomatic relations with Cuba and the with the help of 1,500 Cuban military and Soviet-bloc equipment, began a massive build-up of weapons and troop strength that exceeded that of all other american states combined.

e problems remain. High inflation, ecuation and a soaring foreign debt have

reform could not work.

The right, determined to nullify the reform and discredit the government, organized death squads to kill and terrorize peasants and others who implemented or cooperated with the reforms.

Duarte tried to eliminate such groups with little success. He could not control extreme right whose death squads alienated the peasants and drove them to side with the left. Nor could he even effectively control the actions of his own troops, who committed atrocities against peasants, thinking they were either guerrillas or guerrilla sympathizers.

This vicious cycle left 5,000 dead in 1980 and at least another 5,000 in 1981. This is why each Duarte because he stood for reforms. We hoped that by encouraging moderate reform, we could stave off a leftist takeover until elections, which we hoped would repudiate the violent left and give a mandate for continued peaceful reform, could be held.

The elections were held in March in spite of a majority of parties of the left to appear on the ballot, and despite of the left's threat to kill anyone who went to the polls. The election results were mixed.

Because of the heavy voter turnout, the results could be interpreted as a repudiation of the violent left, yet it was not a clear mandate for continued reform.

The moderates received a plurality, but several parties on the right formed a coalition, gained control and repealed most of the land reform.

U.S. Assistant Secretary of State for international affairs, Thomas Enders, saw a hopefully democratic trend in South America.

The repudiation of the violent left in the Salvadoran election, the subsequent decline in political assassinations (from 600 to 2,000 per month—depending on whom you figures you accept)—or 300 to 500 per month), and the ability of the Salvadorean Christian Democrats and the rightist coalition to continue working together are encouraging indicators.

He cited the recent peaceful elections in Costa Rica and Honduras and the overthrow of the vicious Lucas Garcia regime as further evidence of the trend. Let us hope he is right.

Some wonder if U.S. backing of the repressive Samoza regime for so long didn't irreparably alienate the Nicaraguan reformers and force them to turn to Cuba and the USSR for encouragement, training and financial support to harden their ideological stance as well as limit their and the United States' options in the future.

Many also believe that U.S. support of repressive regimes in the hope of keeping leftists regimes from coming to power empowers the people in those countries toward the U.S.

They argue, ironically, our support of repressive nonleftists regimes may ensure the ultimate triumph of the left and guarantees that it will be anti-American.

What doctor can lick French vanilla frostbite?

BOSTON (AP) — Even the simple pleasure of eating an ice cream cone has hazards.

The letters pages on the New England Journal of Medicine have become a forum for the ailment of medicine often only described in florid medical gobbledygook. Thursday's issue includes an entry for French vanilla frostbite.

The first known case of French vanilla frostbite was recorded by Dr. Lane R. Peterson of the Hennepin County Medical Center in Minneapolis.

The victim was an 18-month-old girl who was given her first cone of ice cream—French vanilla, of course. "She ate the ice cream enthusiastically for minutes, however removing her mouth from the delightful treat."

When the child came home with swollen, dusky lips her babysitter thought she had cold sores, but the doctors diagnosed it as frostbite.

Latin America issues focus of week's talks

The BYU history department will hold a series of lectures and seminars this week studying the controversies in Latin America.

The purpose of the lectures, is to give students insights into the questions of American intervention in Latin America, the governments and the ramifications of supporting one group over another, said Dr. George Addy, a professor of history.

Several guest speakers will participate in the lectures, which will all be in 375 ELWC. Dr. Thomas L. Karnes of Arizona State University will speak Wednesday at 10 a.m. on "The

United States and Central American Military Regimes."

Dr. Frederick Nunn of Portland State University will address "Professional Militarism in South America and the U.S. Response," Thursday at 10 a.m.

In addition, panel discussions on Latin American issues will be Wednesday and Thursday at 2 p.m. "We should learn via the dilemma in El Salvador that the most difficult practical question is what we can do to intervene in the politics of another," Addy said. "Hopefully, students will understand after these lectures the problem of picking favorites in other countries."

'Disease' not really illness

BOSTON (AP) — Fibrocystic breasts are common, but the condition "fibrocystic disease" causes women to worry needlessly about cancer, a group of physicians say.

"There is no link between clinically lumpy breasts or painful breasts and cancer," said Dr. Susan M. Love of Beth Israel Hospital in Boston, one of the authors of the report.

Love said that when a woman is found to have lumps in her breast tissue she is diagnosed as having "fibrocystic disease." A team of experts wants to abolish the term. She said the diagnosis is becoming routine in women who undergo breast biopsies.

The term is so frightening that some women request mastectomies to prevent cancer and their doctors said half of all women have lumps in their breasts and 90 percent have microscopic evidence of fibrocystic disease.

Love, in an interview, said her team would like to eliminate use of the term entirely and instead call the condition "lumpy breasts" or "physiologic nodularity."

"If you send a pathologist a breast biopsy, they'll never report normal breast tissue, be-

cause that will make the surgeon feel bad," said Love, a surgeon herself.

"So instead they'll say fibrocystic disease. The doctor feels better. The patient feels worse."

The doctors based their conclusion on an analysis of several decades of studies concerning fibrocystic disease and cancer.

A great way of life

JOSEPH CANNON

EPA leader says policy misconstrued

By TODD MAYNES
Staff Writer

Public perception that the Reagan administration is anti-environment is a misconception, said Joseph Cannon, a BYU graduate and associate administrator of the Environmental Protection Agency's Office of Research and Development.

Cannon, a 1977 graduate of the J. Reuben Clark Law School, was appointed the EPA's supervisor of policy and resource management in September 1981. As the EPA's third most powerful administrator, his handling of sensitive environmental issues has made him popular with both the press and the public.

Poor coverage

Speaking about press coverage of Reagan and Secretary of Interior James Watt, Cannon said in many ways the administration has made great strides in improving environmental protection and that the press simply hasn't made an effort to understand the complexity of environmental controversies.

"Watt is a target and he's obviously much maligned," Cannon said. "The truth is, though, he's greatly concerned about his stewardship over the earth, and he's looking for what's best for everyone."

In his position at the EPA, Cannon has influence over a wide range of issues, many of which have direct impact on Utah and Utah consumers.

Clear Air Act

EPA administrators are particularly interested in congressional efforts to revise the Clean Air Act, which Cannon said greatly affects Utah and is in need of updating.

"People think because we want to change the Clean Air Act that we want dirty air," he said. "The truth is, however, it's possible to improve the act's effectiveness and still help business and consumers."

For example, Cannon said, Utah power plants that use coal are required to build expensive scrubbing devices to clean the coal, despite the fact that Utah coal is of a low-sulfur type and is cleaner to begin with than eastern coal is after it has been scrubbed.

"It is absolutely ridiculous that Utah plants have to build scrubbing machines," he said.

Revision needed

"Sadly, it's the poor people who pay the most for this because they have to buy more expensive electricity," Cannon said. "In the long run, it's eventually going to cost us all higher utility rates affecting the poor more severely than the wealthy. That's a revision that needs to be made."

Cannon said one of the greatest successes of the EPA under Reagan has been a new policy allowing industry to choose its own system for achieving environmental standards instead of mandating the exact method of cleaning industrial waste.

Engineers at Geneva Steel have been able to save millions of dollars by using an alternative method of pollution control," he said. "Their engineers went to work and found a way to reduce their emissions further than even we asked, and they did it cheaper than they could have previously. Plants all over the country are now studying Geneva's system."

Translation: Fakler's Makes Tire Buying Eeeeeeeeeeeeeeesy!!

- (A) Guideline to keep the letters tracking straight across the page.
- (B) The optimistic sun.
- (C) Speed lane
- (D) Friendly Fakler Tire Salesman: Notice the smile on his face (we have the friendliest, most experienced salesmen in the valley).
- (E) Our Super Heavy Lugger tire (tread design on tire slightly different than shown) used to climb straight up "Y" mountain in the winter.
- (F) A very happy satisfied customer of Fakler Tires — We guarantee that you'll be wearing a "satisfied" smile when you leave our store.
- (G) Our large inventory of new, retread, & used tires (largest of

any tire store in Utah County) gives you the best selection. We carry Michelin, Bridgestone, and General tires; & have over 2000 used tires in stock.

(H) Our Credit Manager — Sally Atwood — she gives you real eeeeeeeeeeeeeezzy terms; and doesn't turn your account over to a bank or finance company (you can tell it's Sally because of the knees & earrings).

(I) Camper pickup truck with Fakler's super duper mud lugs on it. (J) Fakler's Economy candy machine — you can tell what's important to a Five year old artist — complete with chocolate bars and gum.

(K) Budding Artist's signature & picture — She's Five Years old.

RADIAL SNOW TIRES

BRIDGESTONE Radial

Mud & Snow

As low as

SERVICES

9 Reasons why Fakler's Makes Tire Buying Eeeeeeeeeeesy

- (1) We carry our own credit. We don't turn you over to a bank or finance company like most tire stores. If you have a problem, you deal directly with us. And our manager isn't an old "grump" that loves to turn people down.
- (2) We do our own retreading right in the Provo store. That way, we can control the quality of the products & workmanship. Most other tire stores send their tires off to a cheap place to have them retreaded.
- (3) We carry major brands of tires — Michelin, Bridgestone, and General. Whichever of these companies have the best deal to fill your tire needs — that's the one we sell you — we're your professional purchasing agent for tires.
- (4) Our salesmen are true professionals to help you with the buying decision — they aren't part time employees, they aren't fill in salesmen from another company — they're full-time salesmen that have been with the company for years and they know all brands and their advantages & disadvantages.
- (5) We have expert tire technicians on staff — they inspect and repair your tires — they're trained to do the job right.
- (6) We'll store your highway or snow tires over the season free of charge, even though they didn't buy them from us.
- (7) We'll mount your highway tires for you in the spring when you purchase your snow tires from us.
- (8) We have solid, fast service & 3 servicemen who are true professionals — they aren't mechanics, they aren't part time, they just service your tires.
- (9) We have solid, fast service & 3 servicemen who are true professionals — they aren't mechanics, they aren't part time, they just service your tires.
